

D1 Garage 4 12

-Good that it shows the detail of the track in 3D

-Bad that it wont open in 3D, it gives an angle opening option, and that does nothing.

D1 Garage 2 12

-Opens Straight up and will only open some percentage that I haven't taken the time to figure out yet. But with a 7' tall door it will open 5'-6 1/4". 10' tall door will open 8'-6 1/4" etc...

D1 Garage 1 12

-Open the same percentage that D2 12 does, but opens flat and inward.

D1 Garage Parctical Door Wish

D1 Garage 4 12 would open in separate bending panels, and all of the way. Please.
